

Hereditary Lipid Disorders with Premature Coronary Artery Disease Workshop

Sam Mirzaee is a consultant cardiologist and PhD research Fellow at MonashHeart. Sam has a particular interest in assessment of premature coronary artery disease in the setting of hereditary lipid disorders and secondary dyslipidaemia.

Sam's workshop is tailored to GPs who are working with patient's experiencing mental illness. This free workshop will focus on diagnosis and management of Familial Hypercholesterolemia (FH).

You will learn: case-based discussion in risk, diagnosis, treatment and differential diagnosis of FH, as well as focus on secondary dyslipidemia.

Light snacks will be provided.

Date: Monday 24th April 2017

Time: 6:30pm - 7:30pm

Location: Monash Medical Centre, Clayton. Room TBA

Cost: Free!
