

Patient Name/RIS Label:.....

**Please select from the relevant list of studies below:**
**Medicare funded study**

- Epilepsy:** FDG PET study of the brain, performed for the evaluation of refractory epilepsy which is being evaluated for surgery.
- Neurodegenerative Indication:** FDG PET study of the brain that includes quantitative comparison to a normal database, performed for the diagnosis of Alzheimer disease where:
- o Clinical evaluation by a specialist, or in consultation with a specialist is equivocal; AND
  - o FDG PET would assist in the differentiation of Alzheimer disease from other aetiologies; AND
  - o Differentiating Alzheimer disease from an alternative aetiology would alter the management of the patient.

Limit of three scans per patient per lifetime, which are performed no more frequently than once per year, and not applicable if a cerebral perfusion SPECT study has been performed within the previous 12 months.

**Non-Medicare funded studies:**

- Other / Neurodegenerative Indication: (Non-Medicare funded – these indications may attract a charge)

**Monash Imaging Use Only**
**Safety Checklist**

 Pregnancy Check N/A 

 Patient states "NOT" pregnant? Confirmed 

bHCG Value (if applicable): .....

**3 C's**
**Correct Patient** Please tick 3 Patient Identifiers before commencing examination

 Full name  DOB  Address  ID Bracelet  Contact Ward / Relative to identify patient 
**Correct Procedure** Yes  No 

(Patient verification &amp; clinical history) Technologist: .....
