

THE TOXICOLOGY COURSE

Course at a Glance

A two day course covering a sample of the issues and complexities that arise in the management of the acutely poisoned or envenomed patient. The course aims to improve knowledge and understanding of managing these patients and allows participants to put this knowledge into practice in the safe learning environment of a realistic simulated clinical environment

Course Topics

- Initial resuscitation and stabilisation
- Decontamination techniques
- Antidote use
- Envenoming
- ECG and metabolic derangements in toxicological emergencies
- Ethical and legal responsibilities

Who can attend?

Emergency Physicians and advanced trainees in Emergency Medicine, Toxicology fellows and registrars, Intensive care physicians and advanced trainees and senior CMO's with an interest in the management of the acutely poisoned patient.
