

ED HMO Course

Course at a Glance

An interactive half-day simulation course specifically designed to equip Critical Care HMOs and ED Nursing TCP candidates with a structured approach to the initial assessment and management of acutely unwell patients.

Course Topics

The course incorporates a number of interactive methods to generate discussion about the initial assessment and management of acutely unwell patients, and to highlight the important principles of effective teamwork skills that are known to enhance patient safety. It also covers other elements of patient management including the process for engaging with other departments as well as select key procedural skills.

It includes the use of realistic clinical simulation scenarios, facilitated discussions, small group procedural teaching and workshops to assist clinicians with improved confidence and competence when managing acutely unwell patients. The course consists of five parts, each part will be run twice. Participants should aim to attend each part once.

Who can attend?

This program has been specifically developed for **Monash Health** HMO2s in the Critical Care Stream and TCP nurses.
