

Drink fridge planograms

A healthy fridge planogram is a customised product display diagram that assists canteen staff/volunteers on how the fridge should be stocked and displayed. These layouts display green drinks at eye level for a child.

Suggested planogram for fridges in front of counter

Suggested planogram for fridges behind counter

To help sustain the changes in your fridges, use the healthy fridge planogram and drinks classification table as a starting point to develop a healthy fridge layout tailored to your canteen. Display your healthy fridge planogram in the canteen where staff can see it when re-stocking fridges and keep the drinks classification table handy to identify swaps or alternative options if certain beverages are unavailable.
