Procedure/Policy title:	Key changes:	Approval month:
Research Participant	New procedure to align with current National Standard Operating Procedures.	March
<b>Information and Consent</b>	Informs readers that Monash Health will accept either NHMRC Information and Consent	
Forms (new procedure)	form template, or the InFORMED approach for ethics review, and provides general	
	information that is to be included in all consent forms.	
REDCap Access Procedure	New procedure.	August
(new procedure)	Monash Health recently built a server for REDCap and have appointed a Systems	
	Administrator. REDCap is available via the Clinical Portal. To provide clarity on how to	
	access REDCap, the sorts of uses it is approved for and training a PROMPT procedure	
	has been developed by RSS, Library and the Systems Administrator.	
Research Data Storage,	Updated to clarify that access to the My Health Record is restricted to the Monash	August
Retention, Privacy &	Health research team only. Specific consent must also be obtained on the Monash	
<u>Confidentiality</u>	Health Participant Information and Consent Form.	
Research Governance and	Procedure updated to add the following information:	August
Site Specific Authorisation	<ul> <li>Step-by-step guide to making an SSA submission and receiving SSA Authorisation</li> </ul>	
(SSA)	before a project can commence at Monash Health.	
	Data Governance & Artificial Intelligence Steering Committee approval is required if	
	the study involves Artificial Intelligence or a large amount of data such as a Clinical Quality Registry.	
	Approval from the Chief Digital and Information Officer or nominee is required if the	
	project involves data being obtained via Business Intelligence.	
	<ul> <li>Include <u>Health Studies Australian National Data Asset (HeSANDA) Program -</u> a new</li> </ul>	
	national online portal to help researchers access and share data from health	
	studies. It is a catalogue of clinical trials and data sets collected across Australia	
	by universities, medical research institutes, clinical trials networks and health	
	services. If researchers would like to consider sharing project data in the future,	
	Monash University has developed a simple <u>request form</u> to initiate the process to	
	register the study on the HeSANDA Monash Node.	
Site Specific Authorisation	This is a new document developed to assist researchers with putting together a clean and	August
Checklist for Research	efficient SSA submission for the Research Governance Office.	
Projects (new tool)	This checklist lists all the supporting documents required to make an SSA submission and	
	includes the following key information:	
	Data Gov & Al Steering Committee approval is required if the study involves Al or a large	
	amount of data such as a Clinical Quality Registry	

Remote Access to Electronic Medical Records (EMR) by Sponsors of Commercially Sponsored Clinical Trials	<ul> <li>Approval from the Chief Digital and Information Officer or nominee if the project involves data being obtained via Business Intelligence</li> <li>Include Health Studies Australian National Data Asset (HeSANDA) Program - a new national online portal to help researchers access and share data from health studies. It is a catalogue of clinical trials and data sets collected across Australia by universities, medical research institutes, clinical trials networks and health services. If researchers would like to consider sharing project data in the future, Monash University has developed a simple request form to initiate the process to register the study on the HeSANDA Monash Node.</li> <li>Updated broken links under 'References' on page 6.</li> </ul>	August
Good clinical practice training	Content updated to advise:	September
research	<ul> <li>GCP compliance reports will be reported annually to the Research Strategy &amp; Governance Group to establish monitoring of GCP compliance and meet the requirements of the National Clinical Trials Governance Framework and the Ernest &amp; Young Audit.</li> <li>That the ICH E6(R3) are expected to be adopted in January 2026 by the Therapeutic Goods Administration with a 12-month transition period, enabling sponsors, trials sites and other stakeholders time to meet the updated requirements. Monash Health will align with this timeframe and require all researchers to have completed updated ICH GCP training on R3 by February 2027.</li> </ul>	
Research Related Feedback	Content updated to clarify:	September
(Complaints and	The complaint delegation pathway as not all complaints go to Head, Research	
Compliments)	Operations.  The definition of formal complaints	
Research Progress, Final and	The definition of formal complaints.  Content updated to:	September
Site Closure Reports	<ul> <li>Inform that progress reports must be submitted by 30 April and there will be a grace</li> </ul>	Coptombol
	period up until 30 May, after which the form will close.	
	<ul> <li>Projects that do not submit a progress report for two consecutive years, will be</li> </ul>	
	prioritised for a research governance audit, which will also involve the principal	
	investigator demonstrating that invoicing and reconciliation are completed in	
	accordance with the research agreement schedule of payments.	

Monash Health Research	This is an existing resource available to Monash Health research staff to help researchers	September
Support Services Self Audit for	to ensure that their study documentation and records are compliant with the National	
<u>Researchers</u>	Statement on Ethical Conduct in Human Research (NHMRC). This is now available on	
	PROMPT.	
Honorary Researcher	Updated to reflect a change from Director of Clinical Research to Director, Research &	October
Appointment Application	Innovation.	
<u>Human Research Ethics</u>	These procedures and checklists have been updated to include Health Studies Australian	October
Review and Site Authorisation	National Data Asset (HeSANDA) Program - a new national online portal to help researchers	
<u>Human Research Ethics</u>	access and share data from health studies. It is a catalogue of clinical trials and data sets	
Review Checklist for Research	collected across Australia by universities, medical research institutes, clinical trials	
<u>Projects</u>	networks and health services. If researchers would like to consider sharing project data in	
	the future, Monash University has developed a simple <u>request form</u> to initiate the process	
	to register the study on the HeSANDA Monash Node.	
Research Ethics and	This procedure has been updated to advise the following:	November
Governance - Safety Reporting	<ul> <li>All SUSARs are to be reported on ERM and not RiskMan.</li> </ul>	
	Incident reporting must follow Monash Health Clinical Incident Reporting policy.	
	Remove outdated content about reporting of research related fatal events that	
	occur in Monash Health participants (see page 4 of 8)	
	A complaint should be reported and managed as per the Consumer Feedback	
	(Complaints & Compliments) Procedure.	
	Transfer the procedure onto the current PROMPT procedure template.	
	The state of the s	
Research Conduct Under the	This is a new procedure to advise researchers about how Clinical Trial Notifications are	November
Clinical Trials Notification	lodged and who is responsible for the lodgment. This procedure was created to reduce the	
Scheme (new procedure)	number of queries raised about how CTN application is to be completed.	

Total of 15 procedures were updated in 2025
