

Team Response to Airway Crises

Course at a Glance

Critical care nurses and doctors are often called upon to manage the complex airway of an acutely unwell patient. Along with the challenges of forming a cohesive team, there may be differences in the clinical approach and management between specialties, which can add an extra layer of difficulty to an already challenging situation.

Course Topics

- TRAC provides participants from critical care specialties with a shared template for the management of the unanticipated difficult airway. Along with practising the technical skills necessary for advanced airway management, participants will explore the human factors skills vital for effective team performance.
- TRAC uses a blended learning approach to improve airway planning and intubation skills. The program incorporates videos, discussions, clinical workshops and simulation to explore the topics of rapid sequence induction (RSI) and non-surgical and surgical techniques to safely manage the unanticipated difficult airway.

Who can attend?

Critical Care (Emergency/ICU/Anaesthetic) Doctors:

- Consultants • Senior registrars • Junior registrars with a minimum of one year experience in critical care • HMOs/SRMOs with a minimum of one year experience in critical care

Critical Care Registered Nurses:

- Critical care (including PACU) nurses with a minimum of one year experience assisting with airway management • Endoscopy/diagnostic imaging nurses with a minimum of one year experience performing the role of airway assistant • Critical care nurse educators.

Nurses: Prior to booking please ensure that you have the **support from your manager**. If you intend to take study/professional development leave, this needs approval from your manager. If you do not attend your booked session, your manager will be informed.

National Safety and Quality Health Service Standards, Second edition-2021. Standard 8: Recognising and responding to Acute Deterioration Standard

Course Dates 2026

Tuesday 27th January
Thursday 2nd April
Thursday 23rd July
Thursday 17th September
Thursday 12th November

Course Timings:

8.00am to 4.00pm. To allow the course to run on time, we request that you arrive 15 minutes prior to the course start time.

Venue:

Monash Simulation
Moorabbin Hospital
823-865 Centre Rd
East Bentleigh
VIC 3165
