

Introduction to Scenario Design

Course at a Glance

Are you a healthcare professional looking to enhance clinical team performance through simulation-based education? This immersive workshop is designed to build your confidence and capability in designing and delivering effective simulation scenarios that make a lasting impact. Combine theory with practical application in small groups, supported by Monash Simulation's inter professional team of experienced simulation educators.

Who can attend?

Healthcare professionals from any discipline who are interested in using simulation to improve team training, communication, and patient safety in their workplace.

Course Topics

- Principles of scenario design, including the benefits and limitations of simulation-based education
- Identifying learning needs and conducting a targeted needs analysis
- Strategies for creating and achieving meaningful learning outcomes
- Techniques for fostering a psychologically safe yet appropriately challenging learning environment
- Practical tips for success and strategies to promote learner engagement
- Opportunities to test your scenario, receiving real-time coaching and feedback
- Approaches to evaluating the effectiveness of your scenario

Please Note:

This workshop focuses on scenario design and delivery and **does not include training in simulation debriefing techniques.**

For those wishing to further develop their debriefing skills, Monash Simulation offers a fully interactive [2-day Debriefing Course](#) which complements this workshop. Participants who attend both courses are eligible for a **10% discount on the second course registration.**
